

The DataBank Cloud

A Flexible, Secure, & Comprehensive Hosting Solution for OnBase

Let's face it, things like data security and system health might not be the most exciting parts of your job. But they will keep you up at night if they aren't protected.

In today's world, it's no longer a question of "if" the cloud is right for you - it's which cloud solution is going to be the best fit.

In a sea of options, our clients have come to us for years seeking a more comprehensive solution for OnBase cloud hosting. The DataBank Cloud was created to eliminate red tape and rigidity without compromising security. We've expanded our solutions to support clients in their modernization efforts, on their terms.

Fully-supported. Scalable. Simple. Welcome to The DataBank Cloud, we built it just for you.

To the Cloud and Beyond

Forge Your Path

We evaluate your system to create your custom Cloud Roadmap. Pre-migration requirements, timelines, and project schedules are established so you don't miss a beat.

Making the Move

With a true "lift and shift" approach, we take what you have and move it without interrupting your day-to-day. Plus, migration fees are included so you have just one annual fee.

We Hit the Ground Running

With ongoing support and hosting taken off your plate, you reap the benefits of increased efficiency and operating power, with less to manage.

What You Get

- Dedicated support extending beyond migration
- Increased access with the DataBank Cloud Portal
- Simple, all-in price that includes your upgrade fees
- Full reporting capabilities
- And so much more - let's talk about it

Stop Worrying About

- Managing your hosting environment
- Aging hardware
- Data security and system health
- Disaster recovery
- Staying up to date with OnBase versions

Who We Are
